# LET TER OF TRANSMITTAL 

#### Abstract

Treasury Department, Office of Commissioner of Internal Revenue, Washington, D. C., February 10, 1960.

Sir: I am transmitting the $U$. S. Business Tax Returns in the Statistics of Income series for 1957-58.

The purpose of this report is to present, in one volume, summary information for sole proprietorships, partnerships, and corporations. The source data are returns and schedules filed for accounting periods ended July 1957 through June 1958.

Sole proprietorship and partnership data will not be published elsewhere for this incone year. However, numerous tables covering additional topics from the corporation returns are contained in the complete report, Statistics of Income-1957-58, Corporation Income Tax Returns.

This is the first publication of U. S. Business Tax Returns. A more detailed report is planned for income year 1958-1959. Respectfully,

# U.S. BUSINESS TAX RETURNS, 1957-58 

This report marks the beginning of annual tabulations for unincorporated businesses engaged in all types of business activity. Not only are income data for sole proprietorships and partnerships assembled in one volume, but also, for convenience, there are included certain corporate statistics, sumnarized from the more detailed tables in the complete report, Statistics of Income, 1957-58, Corporation Income Tax Returns. For subsequent years, a $U$. S. Business Tax Returns volume will be prepared by the Internal Revenue Service and sold by the Superintendent of Documents, Govermment Printing Office, Washington 25, D. C.

Represented are about $10,650,000$ business organizations. Sole proprietorships number 8,738,000, partnerships 971,000, and carporation returns 940,000. The number of active corporations is somewhat higher than the 940,000 returns shown herein, as data for an additional 13,500 subsidiary companies are included (and cannot be identified separately) in the consolidated tax returns filed for affiliated groups of companies.

If the reader is interested in "small" business, he may wish to combine the material for over 9,700,000 sole proprietorships and partnerships with that for the smaller corporations, such as the 821,000 corporation returns in table 8 with total assets under $\$ 1,000,000$.

A few important items are emphasized in this report: Number, business receipts, and net profit or net income. Also, for partnerships and corporations, gross profit is tabulated. Nine tables are presentedthree each for sole proprietorships, partnerships, and corporation returns. The first table for each of these three forms of organization (tables 1, 4, and 7) contains rather detailed industrial groups. The second table in each set (tables 2, 5, and 8) presents a significant gross size classification-sole proprietorships and partnerships are classified by size of business receipts and corporation retums by size of total assets. The third table in each set (tables 3, 6, and 9) presents a frequency by size of net profit or income. The data in the second and third set of tables are also classified by industry.

PROFITS
Eight out of ten unincorporated businesses reporteda net profit and six of every ten corporation returns showed a net income for the income year 1957-58. For unincorporated businesses, there were 7,874,000 with net profits totaling $\$ 32$ billion and $1,835,000$ with net losses of $\$ 3.5$ billion. For returns of active corporations, there were 573,000 with net incomes equaling $\$ 49$ billion and 367,000 with deficits of $\$ 4$ billion.

As shown in tables 1, 4, and 7, large amounts of profits were reported for certain industries. For unincorporated businesses with net profit, the 3,600,000 engaged in trade and services accounted for 58 percent of the $\$ 32$ billion net profit. For active corporations with net income, the 87,600 returns for manufacturing accounted for 49 percent of the $\$ 49$ billion net income.

Some industries, notably construction, had a better profit record than others. In the construction industry, 93 percent of the unincorporated businesses showed a net profit. For corporation returns, firms
engaged in finance, insurance, and real estate had the most successful year. In this industry, 64 percent of the corporation returns showed a net income. On the other hand, mining and quarrying was a more risky activity. Over half of the corporation returns for mining and quarrying showed a deficit. Unincorporated mines and quarries did somewhat better-over 60 percent had a net profit.

For all profitable firms, 78 percent reported a net frofit or income of less than $\$ 5,000$ (see tables 3, 6, and 9). This percentage is influenced by the large number of sole proprietorships with relatively low profits. Not only did 84 percent of the profitable sole proprietorships have a net profit of less than $\$ 5,000$, but 55 percent had a net profit of less than $\$ 2,000$. Slightly less than half of both partnerships and corporation returns showed a net profit or income under \$5,000.

Charts 1, 2, and 3 give the percentage distribution of net profitor income among various industrial activities for sole proprietorships, partnerships, and corporations.

## BUSINESS RECEIPTS

Receipts from business activity aggregated \$931 billion for 1957-58. As would be expected, a large portion, $\$ 685$ billion, was reported on active corporation returns. The receipts of manufacturing and trade, reported on 444,000 returns, comprised 81 percent of the corporate business receipts. Trade is also an important activity in the sole proprietorship and partnership areas. Over half of the \$246 billion business receipts of unincorporated businesses was applicable to trade.

By far the largest number of businesses was in the agriculture, forestry, and fishery group, which is predominantly farming and related activities. Of the 3,614,000 businesses in this group, 3,453,000 were sole proprietorships with business receipts of nearly \$24 billion.

Tatie $A$ contains a summary of the receipts of $U . S$. businesses, for eight broad industry categories. Tabies 2 and 5 for unincorporated businesses present receipts for iz more detailed industries, classified by size of business rectipts. The industrial detail in tables 2 and 5 is presented for returns with net profit, and returms with net loss are shown in

Chart 2. - PartNership net profit distributed by industry

aggregate. Table 8, for active corporation returns, presents business receipts classified by the eight broad industry categories used for table $A$. The corporate material is classified by size of total assets, a significant gross size classification available from the complete report, Statistics of Income, 1957-58, Corporation Income Tax Returns.

## GROWTH

Unincorporated businesses increased 29 percent in number in the ten-year period 1947-48 to 1957-58. Moreover, the business receipts of sole proprietorships and partnerships increased 53 percent during the same period. For both types of organizations, the increase in business receipts for the service industries was over 95 percent. The number of unincorporated businesses engaged in services increased 57 percent during the same ten-year period. Data for each intervening year in this period are not available for sole proprietorships and partnerships.

| Unincorporated business | Percent increase, 1947-48 to 1957-58 |  |
| :---: | :---: | :---: |
|  | Number | Business receipts |
| Sole proprietorships. | 32 | 61 |
| Partnerships. | 9 | 41 |

The number of corporation returns increased 70 percent from 1947-48 to 1957-58. The business receipts of corporations, like those of unincorporated business organizations, increased substantially, 94 percent, from 1947-48 to 1957-58.

Table B shows the number and the business receipts for each type of organization for the three income years, 1957-58, 1953-54, and 1947-48.

Table B. - SOLE PROPRIETORSHIPS, PARTNERSHIPS, AND CORPORATIONS: NUMBER AND BUSINESS RECEIPTS 1957-58, 1953-54, AND 1947-48

## SOURCES OF THE DATA

Financial data for this report were obtained from returns and schedules filed for income year 1957-58. Different terms are used on the returns and schedules applicable to sole proprietorships, partnerships, and corporations to describe items similar in nature. Throughout this report, where such items have the same basic definition, one name has been employed. An example is "Business receipts." This term is used to describe what is labeled total receipts on the business schedule of Form 1040, gross receipts on Form 1065, and gross sales and gross receipts from operations on Form 1120.

The tax laws and regulations prescribe varying treatment of income and deduction items includable in computing sole proprietorship net profit, partnership net profit, and corporation net income. Net profit and net income, therefore, are not strictly comparable.

## Returns and Schedules Used

Sole proprietorships.-An individual income tax return must be filed by every citizen and resident alien who receives $\$ 600$ or more gross income ( $\$ 1,200$ if over 65 years of age) and by every person, subject to the self-employment tax, who had self-employment income of $\$ 400$ or more. Financial data pertaining to sole proprietorships were obtained from the business schedule C and the farm schedule F filed with the Form 1040.

Partnerships.-Although a partnership is not taxed as an entity, it is required to file an information return, Form 1065. Each individual partner is taxed on his distributive share of the total partnership income, whether or not it is actually distributed. For Federal income tax purposes, a partnership can be a syndicate, joint venture, pool, or other unincorporated organization which carries on any business or venture, and which is not, within the meaning of the Internal Revenue Code, a trust, estate, or corporation.

Corporation returns.-Domestic and resident foreign corporations, except charitable and other civic and business associations expressly exempt from taxation under section 501 of the Internal Revenue Code of 1954, must file income tax returns, whether or not they transacted business during the current year. Data on corporations were obtained from returns in

the Form 1120 series filed by active, nonexempt corporations.

Returns and schedules, marked to indicate items tabulated, are shown on the following pages:

$$
\begin{aligned}
& \text { Sole proprietorships....... pp. 20-22 } \\
& \text { Partnerships................. p. } 23 \\
& \text { Corporations................. pp. 24-27 }
\end{aligned}
$$

## Number

Sole proprietorships. -The number of businesses operated by single owners. If several business schedules are filed with one return, each is classified separately according to industrial activity. If two or more businesses of the same type are included, they are processed as one business. Community property businesses divided between husband and wife for income tax purposes are considered as a whole and counted as one business.

Partnerships.-The number of active partnerships, not the number of partnership returns. Duplicate returns, which may have been filed for the same partnership, are eliminated.

Corporation returns. - The number of returns filed for active corporations. A group of corporations filing a consolidated return is counted as one return.

## Business Receipts

Sole proprietorships.-Total receipts from sales and services,less rebates, returns, and allowances, plus other business income. Total receipts do not include long- or short-term capital gainsor losses, nor do they include investment income not associated with the taxpayer's business. The business receipts are understated by an indeterminable amount since receipts were not reported for 329,000 enterprises, which did, however, report net profit or loss.

Partnerships.-Gross receipts from sales and services, less rebates, returns, and allowances.

Corporation returns.-Gross sales plus gross receipts from operations, less rebates, returns, and allowances.

A sizeable part of the income of corporations and partnerships engaged in Finance, insurance, and real estate is not reflected in their business receipts because reporting instructions prescribed separate entries for investment income.

## Net Profit (or Loss)

Sole proprietorships.-The difference between gross profit and total deductions. The amount is reported on line 23, page 1, of schedule C and line 10, schedule F, Form 1040.

Partnerships. - The difference between gross profit and total deductions. The amount is reported on line 25, page 1, Form 1065. In computing partnership net profit, the deduction for contributions and the net operating loss deduction are not allowed. For partnerships engaged in Finance, insurance, and real estate, ordinary income has been tabulated. Ordinary income equals net profit, as defined above, plus investment income, income or loss from other partnerships, net gain or loss from the sale of property other than capital assets, and other income received by the partnership. Ordinary income is reported on line 33, page 1, Form 1065.

Long- and short-term capital gains or losses, contributions,certain dividend and interest income, and other income and deduction items specified by the tax laws or regulations are not included in computation of partnership income or profit. Instead, each partner enters his distributive share of such items, under their respective headings, on his individual income tax return.

## Net Income (or Deficit)

Corporation returns.-All items of taxable income less business deductions. The special deductions and the net operating loss deduction are not included. Net income is equivalent to line 32, page 3, Form 1120 and line 15, page 2, Form 1120L and line 18, page 1, Form 1120M.

Businesses with zero net incomeor profit were included in the net loss or dericit category.

## Gross Profit

Partnerships.-Business receipts less cost of goods sold as reported on line 11, page 1, Form 1065.

Corporation returns.-Business receipts less cost of goods sold and cost of operations.

Gross profit, in aggregate, for both partnerships and corporation returns, has been reduced by any gross loss reforted.

## INDUSTRIAL CLASSIFICATION

Thsre are eight tasic industries, subdivided for sole proprietorships and partnerships into 76 industrial groups. For corporations, the eight industries are subdivided into 65 categories that are generally comparable to the 76 categories used for the other business enterprises.
The industrial classification used for all Statistics of Income reports is based on the 1945-49 Standard Industrial Classification issued by the Office of Statistical. Standards, Bureau of the

Budget, Executive Office of the President. The Standard Industrial Classification, developed to classify establishments, was adapted to an ownership or legal entity basis. In general, the definitions in the Standard Industrial Classification were accepted, but certain combinations were appropriate in order to present statistics on an ownership basis.

Each corporation,partnership, and sole proprietorship is classified according to the business activity accounting for the largest percentage of its total receipts. Even though a corporation may have numerous diversified activities, the data from each return must be tabulated for asingle activity which meets the above definition. Each sole proprietorship is classified separately according to each business schedule. However, two or more businesses in the same industry, reported on separate schedules by a single taxpayer, are combined as one. Partnership returns are classified by the major activity of the partnership.

Three variations from the definitions in the Standard Industrial Classification, used for the Statistics of Income reports, are:
(1) Public utilities.-Radio and television broadcasting is classified as a public utility (Communications) rather than as a service.
(2) Wholesale trade.-Commission merchants are distinguished from other kinds of wholesalers in the corporation industrial categories. For Statistics of Income, the group, Commission merchants, includes all types of corporations principally engaged in commission or fee wholesaling-such as agents, brokers, manufacturers' agents, selling agents, purchasing agents, assemblers of farm products, and auction houses. If their commissions are equal to 10 percent or more of their regular sales, corporations combining commission and regular wholesaling are also included.

For sole proprietorships and partnerships, commission merchants are presented with wholesalers other than those trading in farm products or food.
(3) Holding andother investment companies. -These companies are defined as those reporting dividends as the largest single item of income and with dividends, interest, and capital gains constituting 50 percent or more of total receipts. Corporations not meeting these criteria may be included in the industrial group, Credit agencies other than banks.

## DESCRIPTION OF THE SAMPLE AND LIMITATIONS OF THE DATA

Data presented in this report are based on a stratified systematic sample of returns and schedules filed for the income year 1957-58, covering accounting periods ended July 1957 through June 1958.

Over half of the corporation returns with a full 12-month accounting period were filed on a calendaryear basis. Net income, as reported by those with accounting period ended December 1957 was nearly $\$ 38$ billion, compared with slightly over $\$ 11$ billion reported by all other corporation returns. The overwhelming majority of sole proprietorships and most of the partnerships filed calendar-year returns.

Statistics were obtained from returns of active corporations and partnerships. An active corporation or partnership, for purposes of Statistics of Income, is one for which at least one income or deduction item is reported on the return form. The returns of inactive partnerships and corporations which were excluded constituted less than 3 percent of the total number of partnerships and corporation returns. In addition, data from returns of organizations exempt from tax, filing return forms in the 990 series, were not included in the corporation statistics.

Excluded from the statistics on sole proprietorships were business schedules filed by partners reporting their self-employment income. These schedules were filed in accordance with section 6017 of the Internal Revenue Code of 1954, requiring returns from individuals who had net earnings from selftemployment of $\$ 400$ or more. Also excluded from the sole proprietorship data were returns of fiduciaries reporting, on Form 1041, trade or business income. Statistics of Income-1956, Fiduciary Income Tax Returns for 1956 includes information on some 21,000 returns of trusts and estates with gross profit or loss from trade or business.

Data from Form 1120 returns filed by partnerships and sole proprietorships choosing to be taxed as corporations were excluded from any tabulations. This group is estimated to number about 200. Tentative returns and those not associated with their originals were also excluded from tabulations of data for all types of returns.

## Description of the Sample

Uniform methods of classifying returns were prescribed for each of the 64 district offices and the International Operations Division in Washington, D. C., to facilitate the administrative processing of returns for collection and audit purposes. The sample design was adapted to fit the regular numbering and grouping procedures used by the Collection Division.

Returns of individuals were classified by presence or absence of business income, size of adjusted gross income, and taxpayment status. Partnerships were classified by size of gross receipts or total income. Returns of corporations were classified by size of gross sales, gross receipts, or total income, by taxable and nontaxable status, and taxpayment status.

## Sole proprietorships

The total sample, based on individual returns with business income, consisted of 101,264 returns. This constituted about 1 percent of the total number of $9,985,593$ individual income tax returns with business schedules C or F that were filed for the year.

Individual returns with business income which showed adjusted gross income of $\$ 150,000$ or more were selected at a one-to-one ratio. Various sampling ratios were prescribed for the other returns included in the stratified systematic sample.

The number of returns with business schedules filed, the number of such returns in the sample, and the prescribed sampling ratio by sampling strata were:

| Sampling strata | $\frac{\text { Number of }}{}$ | $\begin{aligned} & \text { returns } \\ & \text { In } \\ & \text { sample } \end{aligned}$ | ```Pre- scribed sampling ratio``` |
| :---: | :---: | :---: | :---: |
| Form 1040 , total. | 9,985,593 | 101,264 | -- |
| Adjusted gross income: |  |  |  |
| Under \$10,000: |  |  |  |
| Schedule C. | 5,627,819 | 44,546 | 8/1000 |
| Schedule F. | 3,235,480 | 9,364 | $3 / 1000$ |
| $\$ 10,000$ under $\$ 50,000$, schedules C and F................... l,073,320 30,402 3/100 |  |  |  |
| $\$ 50,000$ under $\$ 150,000$, schedules C and F................... | 44,856 | 12,834 | 3/10 |
| \$150,000 and over, schedules |  |  |  |
| C and F.. | 4,118 | 4,118 | 1/1 |

${ }^{1}$ Includes returns with business schedules filed by partners reporting their self-employment income.

## Partnerships

Over a million partnership returns were filed for income year 1957-58. An adjustment for duplicate partnership returns, sometimes filed for more than one partner, reduced the total number to 982,422. Over 3 percent of this number was included in the total sample of 33,691 returns. Included in the total number filed are 11,815 inactive partnership returns, from which no data were tatulated.

The information on partnerships is derived from a stratified systematic sample of all returns reporting gross receipts or total income of $\$ 500,000$ or more and of other returns, not meeting the requirements for 100 percent coverage, which were sampled at various ratios.

The number of partnership returns filed, the number in the sample, and the prescribed sampling ratio by sampling strata were:

| Sampling strata | Number of returns |  | Prescribed sampling ratio |
| :---: | :---: | :---: | :---: |
|  | Filed ${ }^{1}$ | $\begin{gathered} \text { In } \\ \text { sample } \end{gathered}$ |  |
| Form 1065 , total | 982,442 | 33,691 | -- |
| Gross receipts and total income each less than $\$ 20,000$. | 911,591 | 9,446 | 1/100 |
| Either gross receipts or total |  |  |  |
| income between \$200,000 and |  |  |  |
| $\$ 500,000$ and none $\$ 500,000$ or more. | 48,630 | 2,276 | 1/20 |
| Either gross receipts or total |  |  |  |
| income $\$ 500,000$ or more.. | 22,221 | 21,969 | 1/1 |
| $l_{\text {Adjusted }}$ for duplicate retur | s filed. | Includes | inactive | partnership returns.

## Corporation returns

The total sample consisted of 207,863 returns, about 21 percent of the total number of 984,202
corporation returns filed for the year. Included in the number of returns filed are 44,055 for inactive corporations, from which no information was tabulated.

Returns with gross sales, gross receipts, or total income of $\$ 1,000,000$ or more and all life and mutual insurance company returns, consolidated returns, and returns with overpayment of tax were sampled at a one-to-one ratio. Other returns were sampled at various ratios according to size of gross sales, gross receipts, or total income.

The number of corporation returns filed, the number in the sample, and the prescribed sampling ratio by sampling strata were:

| Gross sales,gross receipts, or total income, each less than \$100,000. $\qquad$ | 545,751 | 51,592 | 1/10 |
| :---: | :---: | :---: | :---: |
| Either gross sales or gross receipts or total income between $\$ 100,000$ and $\$ 1,000,000$ and none $\$ 1,000,000$ or more....... | 348,790 | 66,610 | 1/5 |
| Either gross sales or gross recelpts or total income $\$ 1,000,000$ or more and all consolidated and life and mutual insurance company returns, and returns with overpayment of tax............................ | 89,661 | 89,661 | $1 / 1$ |

${ }^{1}$ Includes returns of inactive corporations.

## Method of Estimation

The total number of returns with business schedules filed, partnerships filing returns, and corporation returns filed was determined from counts made in each of the district offices and submitted to the Statistics Division.

The adequacy of receipts by sampling stratum was reviewed by applying the prescribed sample rates to
the number of returns filed and comparing this expected sample size with the number of sample returns actually received. When receipts of returns appeared to be inadequate, district offices were requested to transmit additional returns. Sample data were extended to the sampling stratum totals by weights obtained by dividing the total number of returns filed in a sampling stratum by the number of sample returns received in that stratum.

## Sampling Variability

Table C shows the relative sampling error of the estimated number of businesses, active partnerships, and returns of active corporations, for selected industries. For the items shown, the table indicates the range in percent within which 19 out of 20 similarly derived estimates would fall.

Table C.-SOLE PROPRIE TORSHIPS, PARTNERSHIPS, AND CORPOR ATIONS: RELATIVE SAMPLING

| Industry | Sole proprietorships |  | ```Active partnerships``` |  | Active corporation returns |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number | Relative <br> sampling error <br> (Percent) | Number | Relative sampling error (Percent) | Number | Relative sampling error (Percent) |
| Agriculture, forestry, and | Not calculated |  | Not calculated |  |  |  |
| fishery. |  |  | 21,833 | 4.95 |
| Mining and quarrying | 33,075 | 17.98 |  |  | 15,383 | 15.11 | 12,675 | 4.59 |
| Construction. | 598,418 | 4.48 | 65,945 | 7.05 | 53,576 | 2.06 |
| Manuiacturing. . | 170,395 | 8.52 | 51,870 | 7.76 | Not calculated |  |
| Transportation, communication, and other public utilities... | 295,561 | 6.53 | 16,873 | 14.59 |  | $2.67$ |
| Trade. . . . . . . . . . . . . . . . . . . | 1,870,401 | 2.19 | 351,074 | 2.64 | 305,117 | 0.72 |
| Wholesale | 260,319 | 6.46 | 53,161 | 7.16 | 103,474 | 1.33 |
| Retail. | 1,538,995 | 2.52 | 266,006 | 3.11 | 178,493 | 1.05 |
| Finance, insurance, real estate. | 425,156 | 5.09 | 170,180 | 4.25 | 276,935 | 0.86 |
| Services. | 1,825,599 | 2.18 | 155,230 | 4.47 | 90,597 | 1.73 |

${ }^{1}$ The table indicates the range in percent within which 19 out of 20 similarly derived estimates would fall.

An extensive system of sample management was used to minimize biases arising from processing errors, incomplete coverage, and inaccuracies in estimating the number of returns filed. The returns and schedules were mathematically verified, but were tabulated prior to official audit by the Internal Revenue Service. Therefore, errors made by taxpayers on the returns were not completely eliminated.
